INTRODUCING LASER CUTTING

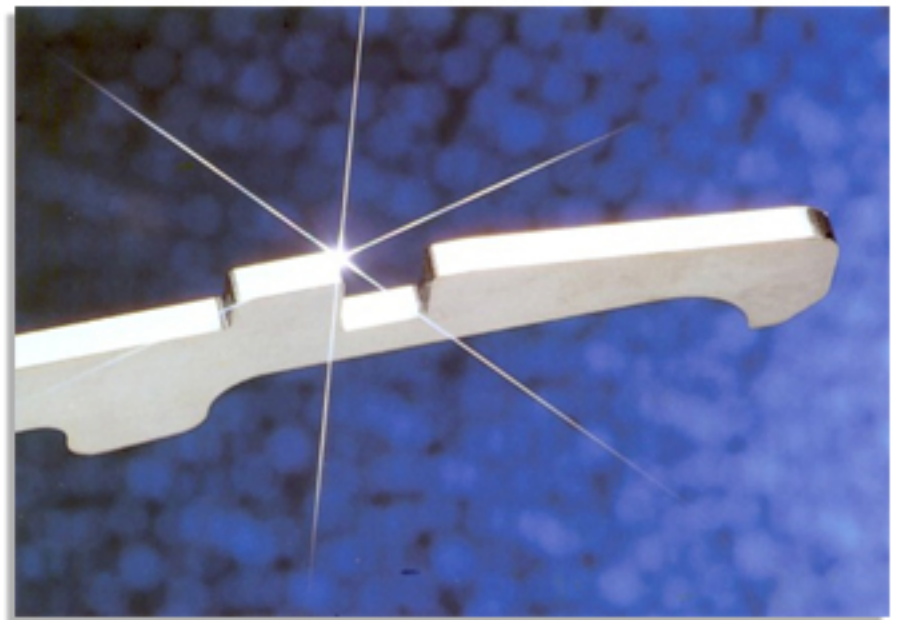

Bystronic
Bystar 4020

New Laser Cutting Capabilities

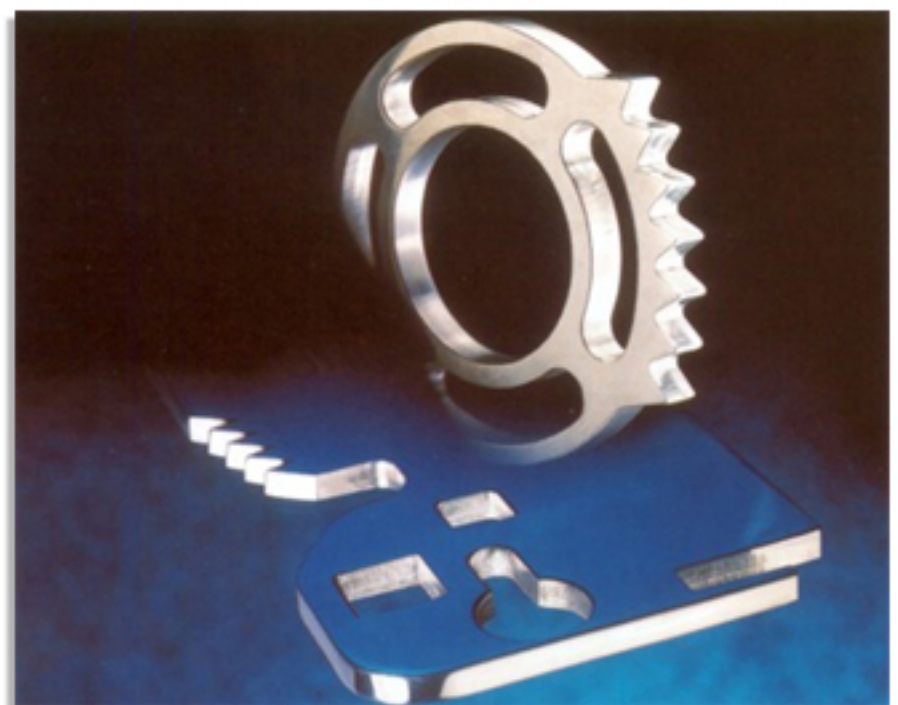

Precision Waterjet has recently added another laser cutting machine to increase capacity & capability of its CNC laser cutting services.

The new Bystronic Bystar 4020 is capable of handling oversized sheets with a cutting envelope measuring 80" x 160" & can cut up to 3/4" thick in mild steel & 1/2" thick in stainless steel.

Laser Cutting Benefits

- Holds tolerances of +/- .003"
- Exceptional cut quality
- Maximize material usage
- Cut complex or intricate shapes
- Ideal for cutting pre-finished material

Laser Cut Material List

steel - stainless steel - aluminum - titanium
 invar - nickel - acrylic - wood
